1. Safety Precautions

Please go over these safety precautions carefully to secure a correct and safe operation of the NittaBeltPoly Heat Press PP200.

⚠️ WARNING
Disregarding instructions marked with this symbol may lead to death or serious injury.

⚠️ CAUTION
Disregarding instructions marked with this symbol may lead to injury or property damage

⚠️ WARNING
Do not use the Heat Press for any application other than the intended purpose of making belts endless. Use for any unintended purpose may cause an unexpected accident. Failure to do this may cause fire, electric shock or injury.

⚠️ WARNING
This machine is not intended for the physical, sensory or mental handicapped persons use. They must have the supervision of a person responsible for their safety, if they use this Heat Press. Failure to do this may cause fire, electric shock or injury.

⚠️ WARNING
Do not allow the child to handle this Heat Press. Keep this machine in the place where child's hand does not reach. Failure to do this may cause fire, electric shock or injury.

⚠️ WARNING
A person with experience and skills should always operate, maintain and inspect the Heat Press. Handling by an inexperienced person may cause fire, electric shock or injury.

⚠️ WARNING
Do not dismantle or remodel the Heat Press in any event. Dismantling or remodeling the Heat Press may cause fire, electric shock or injury. For repair or inspection, please contact your local distributor or agent in your area.

⚠️ WARNING
In case of an emergency (such as smoke, fire, foul smell), disconnect the main plug from the socket outlet and contact Nitta or your local distributor or agent in your area for inspection. Failure to disconnect the main plug from the socket outlet may cause fire or electric shock.
Confirm that the power source used is within the designated specifications of the Heat Press.
Use beyond the designated specifications may cause fire or electric shock.

To prevent fire or electric shock, do not use the Heat Press under the following conditions:
- Under flammable gas or combustible gas environment
- Under a corrosive gas environment
- Under an ambient temperature of 5°C or below
- Under an ambient temperature of 30°C or above
- Under a high humidity environment. (Humidity surpassing 85%)
- In places exposing the Heat Press to steam or water drops

Connect the main plug correctly to the socket outlet.
The power cable of the press uses an earth connection plug. Connect the main plug correctly into an earth connection outlet to prevent electric shock.

Use a conversion plug when the plug shape does not match the socket.
Failure to do this may cause electric shock. The plug shape of the attached power cable is as follows. The conversion plug is not attached. When a conversion plug is necessary, users must provide their own.

Do not use the Heat Press on a flammable material.
Use of any other product may cause fire.

Impressed voltage is distributed in the power cable.
To prevent fire, electric shock or damage, please consider the following.
- Disconnect the main plug from the socket outlet with your hand.
- Do not remodel or replace the main plug.
- Do not place any object on the power cable.
- Do not fold the power cable.
- Do not pull or stretch the power cable.

Use a three-pin earth line as an extension cable.
When an extension cable is required, use an earth-connection type extension cable to prevent electric shock.
To prevent electric shock, do not operate the Heat Press with moistened hands.

Do not pour water on the Heat Press and do not get it wet. Use of a wet press may cause fire or electric shock.

Always use anti-heat gloves when handling the Heat Press to prevent burns. A label “Hot!” is on the top and bottom plates of the press to warn against high temperature.

Disconnect the main plug from the socket outlet immediately after use. An operator should pay attention so that others do not touch the press carelessly and get burned before the Heat Press has cooled down. It takes about one hour for a heated press (110°C) to cool down to 40°C in the room temperature of 25°C once it has been unplugged.

Use a dry cloth for cleaning the Heat Press. To prevent fire, do not use alcohol, benzine, thinner or any other inflammable solvent.

Caution

Do not use the Heat Press outdoors. This product is not intended for the use outdoors.

When using the Heat Press on any equipment, use a safety catcher for the press so it doesn’t fall or collapse. This will help prevent fire, electric shock or injury. This may cause fire or electric shock or injury.

Do not take place on the Heat Press the application of the adhesive. This may cause fire or burns.

Before using the Heat Press be sure to inspect the press in accordance with the procedure described on page 13 to help prevent fire or electric shock.

Do not use this machine for the endless splicing of belt of other manufacturers. Endless splicing may become imperfect if this machine is used for the endless splicing of belt of other manufacturers. This may spoil the full functioning and performance of the belt.
2. Confirmation of Product

Thank you for choosing our Heat Press  PP200

⚠️ CAUTION ⚠️ Check that the product is exactly what you have ordered.
Use of the wrong product may cause fire, electric shock or injury.

2-1) Confirmation of Product

Confirm the following items upon accepting delivery of your order. Contact your local sales office or distributor in your area if you find any deficiency or defect in your item.

① Are descriptions on the face plate the same as those of your order item?
   Please confirm the model type and the power source specifications.

② Has the product been damaged during transportation?

③ Has a nut or screw slackened?

2-2) How to Read Face Plate

![Face Plate Diagram]

① Model type
② Specifications of power source
③ Production serial number

2-3) Notes for inquiry

When making inquiries, please contact us with both the press model and serial number.

2-4) Accessories

Operation Manual, Power cable, Cushion rubber, Release sheet, Thermometer, Hex wrench
3. Specifications

3-1) Outline of Heat Press

① Heat Press is exclusively designed for making endless NittaBeltPoly belts

② Heat Press is compatible with the following endless specifications:
   Joint specifications: skiver endless (Right angle)
   Maximum belt width: up to 200mm
   Maximum belt thickness: up to 5mm

③ Tools required for making skiver endless belts: NITTA Poly Skiver

3-2) Major Specifications of Heat Press

</table>

**WARNING**

In order to prevent fire or electric shock, do not use the Heat Press under the following conditions:
- Under flammable gas or combustible gas environment
- Under a corrosive gas environment
- Under an ambient temperature of 5°C or below
- Under an ambient temperature of 30°C or above
- Under a high humidity environment (humidity surpassing 85%)
- In places exposing the Heat Press to steam or water drops

5. Storage Environment

<tr>
<td>Place of Use</td>
<td>Indoors (free from dust, water)</td>
</tr>
<tr>
<td>Environment</td>
<td>No flammable, combustible or corrosive gas; no steam</td>
</tr>
</tbody>
</table>

**WARNING**

The Heat Press which is not in use should be stored subject to the above conditions.

Wrong or poor storage may cause mechanical disorder to the press and may cause fire or electric shock.

**WARNING**

Before using the Heat Press, perform a prior-to-use inspection and confirm that the press is working properly.
Any problem found in the prior-to-use inspection should immediately be notified to your local sales office or distributor in your area.
6. Name of Each Part

6-1) Main Press Body

- Top plate
- Hook
- Pressure nut
- Heat plate
- Name plate
- Connecter
- Belt clamp
- Power cable
- Thermometer hole
- Plug
7. How to Operate NittaBeltPoly Heat Press

7-1) Required Tool

- Heat Press (PP200)
- Cushion rubber (PP200 contained)
- Release sheet (PP200 contained)
- Thermometer (PP200 contained)
- Anti-heat Gloves (burn-preventive protection kits)
- Stopwatch or timer
- Wrench

**WARNING**

- The Heat Press body reaches a high temperature. Always use anti-heat gloves to prevent burns.

7-2) Preheating

- The stacked sequentially cushion rubber, the Top plate on the lower heat plate.
- Connect the main plug correctly to an electrical outlet, it is done preheating.

**WARNING**

- Be sure to connect an earth line to prevent electric shock.
- It is to a temperature suitable for endless about 60 minutes.
- Do connect or disconnect the power plug ON / OFF of the press.

**WARNING**

- Always use anti-heat gloves when handling the Heat Press to prevent burns.
- This may cause burns.
- An operator should pay attention so that others do not touch the Heat Press carelessly.
- This may cause burns or injury.
# 8. How to Make Belts Endless

## 8-1) Work Procedures

- Insert the thermometer in the thermometer hole.
- It is possible endless heat plate temperature is if it has been about 110 °C.

**WARNING** Always use anti-heat gloves when handling the Heat Press to prevent burns.

- Apply the adhesive to the belt
- **Check the splicing manual method of applying adhesive.**

**CAUTION** Do not take place on the Heat Press the application of the adhesive.

- Is fixed to the center of the heat plate with upward skive surface of the belt.

- Overlaid nylon core to match the belt the other.
- Make sure the joints are not bent at scale, to be fixed in the belt clamp the belt.

**CAUTION** Overlaid nylon core to match the belt the other.

- Belt Centering the heat plate. Pressure is not applied uniformly belt has not been set in the center of the heat plate.
• Overlaid in the order of the release sheet, cushion rubber.

• Close the top plate. Tighten lightly for pressure nut by hand.

• Confirm that the gap between the heat plate and the plate is equality.
• Evenly tighten the pressure nut with a wrench.
※Using a torque wrench, It obtained a stable pressure by checking the tightening torque. Tightening torque about 26N・m at belt width 200, it is possible to ensure the appropriate surface pressure.

• During the heating time, which is described in splicing manual, hold the state in which the heated and pressurized.

• Releasing the pressing knob and remove the belt.
• The belt that was removed from the Heat press, Use it after cooling for 1 hour or more.

WARNING The Heat Press and belt are hot, It may cause burns.
WARNING The Heat Press after use, Unplug the power plug immediately and until cool to a safe temperature, please like other people not to touch carelessly.
# 9. Troubleshooting

<table>
<thead>
